

CommunityLIVE 2026

Solution Builder Agenda Overview

Learn it. Build it. Apply it.

CommunityLIVE 2026 delivers hands-on learning, technical depth, practical insights and real-world examples to help practitioners design, implement and optimize intelligent content and automation solutions with confidence.

Why solution builders and IT leaders attend

- **Hands-on training** with self-paced labs and interactive experiences across Hyland products, including OnBase, Perceptive Content, Nuxeo, Alfresco and Hyland Content Innovation Cloud™ capabilities.
- **Technical deep dives** into AI, intelligent document processing, content intelligence and automation.
- **Peer learning** through user groups, product experts and community discussions.
- **Roadmap clarity** with dedicated product sessions focused on what's new and what's next across your Hyland solutions.
- **Industry context and best practices** you can translate into real solution value, connecting strategy to execution.

Core learning areas

- **AI-driven automation and IDP:** Architecting intelligent workflows and document processing.
- **Content intelligence and analytics:** Preparing unstructured data for AI readiness.
- **Modern architecture:** Building governed, cloud-enabled and scalable content platforms.
- **Integration and optimization:** Connecting systems to streamline end-to-end processes.
- **Experience design:** Building solutions that improve operational and user outcomes.

Personalized conference highlights

- **Technical Training (pre-conference):**
 - Saturday, May 30 and Sunday, May 31.
 - Full-day, in-depth training sessions for developers, admins and architects.
- **CommunityCENTRAL:** Access to product experts, interactive demos, hands-on experiences and sponsor solutions.
- **Agentic AI Throwdown:** Solve a real business case by deploying AI agents across an end-to-end process through this gamified, collaborative experience.
- **User Group sessions:** Industry- and product-aligned peer-led discussions and practical takeaways.
- **More than 100 self-paced labs:** Open throughout the conference, explore real-world solutions,

sharpen your skills and plan your personalized learning experience today. [CHECK OUT THE SELF-PACED LABS](#)

- **Breakout sessions:** A variety of breakout sessions, customer stories and expert panels designed to expand your knowledge and awareness of best practices. Dive deep into the Hyland products you own — including featured sessions for OnBase, Perceptive Content, Alfresco and Nuxeo — as well as additional opportunities to maximize your investment and drive more value across your organization with AI and intelligent automation.
