

KONICA MINOLTA

HEALTHCARE-ENABLED MFP PLUS

& HIPAA-Compliant Cloud Fax

Giving Shape to Ideas

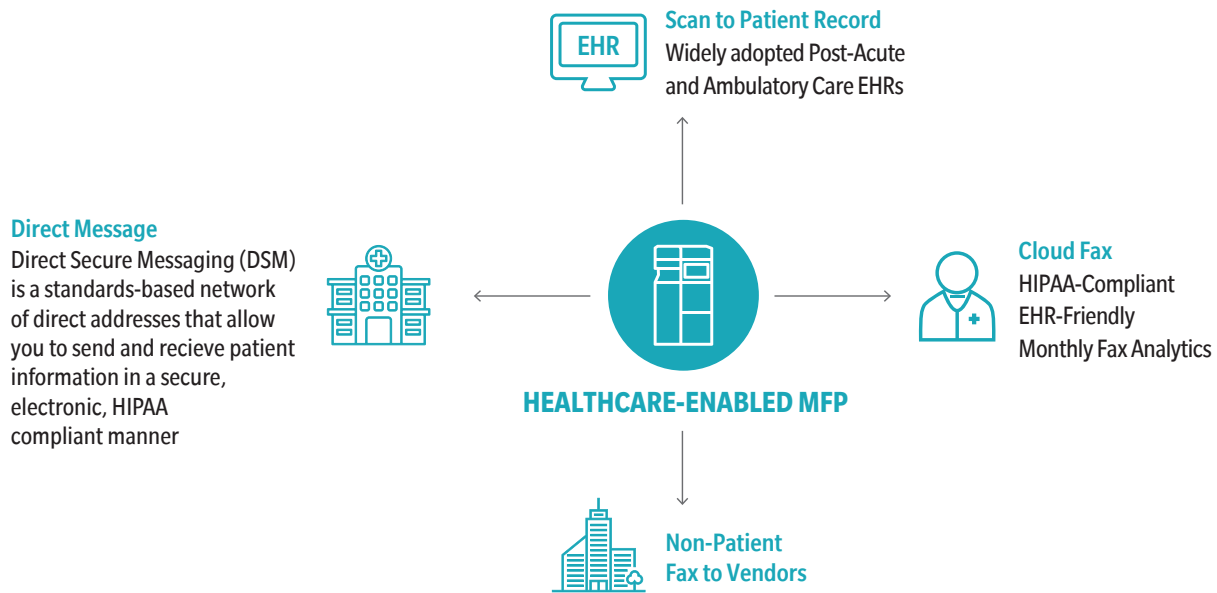

THE SECURE, EFFICIENT, AND EFFECTIVE WAY TO CAPTURE AND SHARE PATIENT INFORMATION

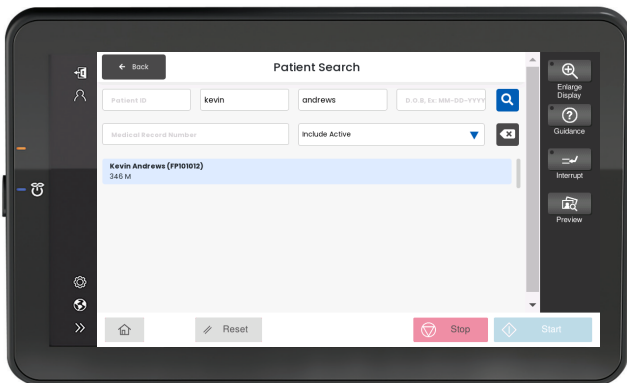

Sharing information between providers, patients, and health plans has never been more important — or more challenging. Despite the implementation of electronic health records, paper continues to play a role in many clinical and administrative processes. Scanning documents to a patient's health record can be a complicated and disjointed process, requiring multiple steps with manual, error-prone processes, consuming administrative staff time. Sharing those documents is largely dependent on legacy fax machines, which pose potential security risks.

The Konica Minolta Healthcare-Enabled MFP Plus, driven by the bizhub One i-Series intuitive interface and robust construction and integrated by Kno2 Connected™, enabling you to quickly and securely capture, store, and share patient information across the care continuum. You'll be able to enhance care coordination, reduce costs, maximize staff productivity, and most importantly, improve patient care.

THE KONICA MINOLTA HEALTHCARE-ENABLED MFP ECOSYSTEM

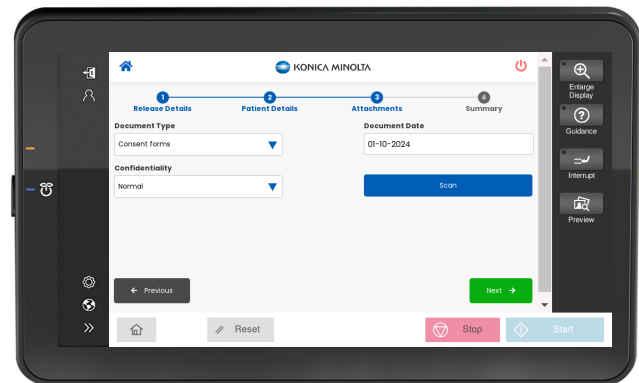

REDUCE TIME ON ADMINISTRATIVE PROCESSES

SHARING PATIENT INFORMATION

- Direct Secure Messaging provides a healthcare industry-standard to securely communicate sensitive PHI with others who use Direct exchange across the nation's largest clinical network
- For healthcare organizations who have not yet begun taking advantage of Direct exchange, HIPAA-compliant cloud fax is available for patient-centric faxing. Patient meta data included on faxes providing easy patient matching for recipient organization

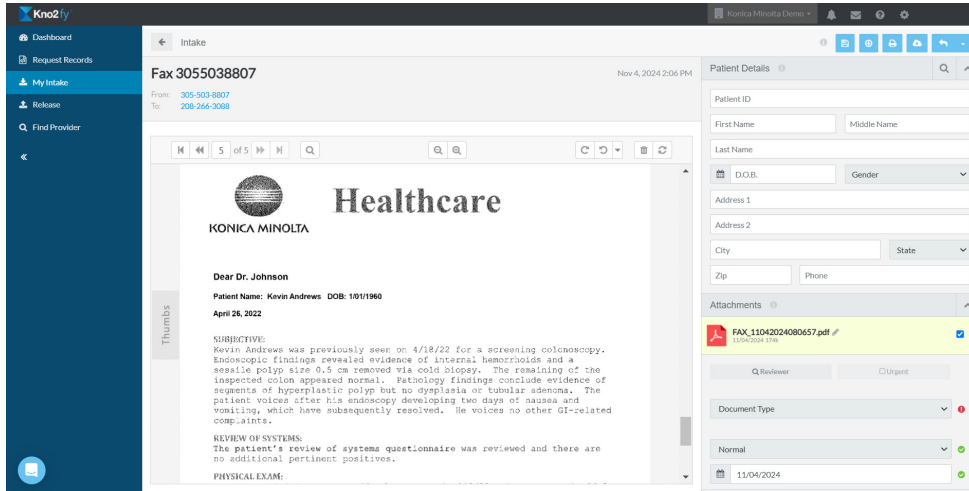

EHR-INTEGRATED SCANNING

- Patient lookup available right from the Konica Minolta bizhub® multifunction device via the Kno2 Connected API
- Document types and patient matching data are all driven by the EHR, providing quick indexing
- Attach documents to the visit date, or even to an open order for effective closed loop order entry and results (based on EHR API)

SECURE, HIPAA-COMPLIANT CLOUD FAX

Patient Information Exchange

Integrated Fax Workflow

Easily incorporate fax into your interoperability workflows, EHRs and other clinical systems to centralize communications, including Direct Secure Messaging and other healthcare exchange protocols.

API Integration

Easily look up patients from the fax intake screen, with the ability to add structure to unstructured fax documents (e.g., name, DOB, gender) for smoother EHR ingestion.

Simplified Faxing

Send faxes directly from your desktop or through the Konica Minolta bizhub Healthcare-Enabled MFP.

INDUSTRY-LEADING MFP SECURITY

Layered Security

- Self-encrypting solid state memory
- Advanced MFP encryption for PHI in transit and at rest
- HIPAA, HITECH, Sarbanes Oxley, PCI audits

- Virus scan
- Real-time Anti-Malware protection

- Dashboards for managing and monitoring print devices
- Instant notifications and alerts if security vulnerabilities are detected
- Ensures industry compliance

- A full-text searchable PDF archive record of all MFP activities (copy, print, fax and scan)
- User, MFP, date and time stamp audit log
- Configurable alert system - email notifications
